FOR MORE
DETAILS

GRU-V air disinfection devices are compact, wall-mounted and manufactured to kill 99.99% of airborne viruses and bacteria thus reducing likelihood of cross-contamination and preventing microbiological contamination of surfaces within the treated areas.

- Effective against all airborne pathogens, including Coronavirus, Influenza, Tuberculosis and common colds
- No ozone, no biocides, no harmful particles or chemicals, no replacement filters
- High grade food-safe materials with shatter-proof UV lamps
- Easy installation and maintenance
- Low cost spare parts
